Response Actions

The following are the different responses you may see when reviewing the response status of your ticket, followed by information you should know about each. When a member selects a response, they also have the option to enter comments and their name. When entered, this information is displayed behind the selected response. If the member has multiple utility types, there may be a separate response submitted for each utility.

- **Located: Facilities marked**
 - If you encounter or see evidence of unmarked underground utility/facility lines, cease excavation and contact MS811 immediately.
- **Clear: No conflict**
 - If you encounter or see evidence of unmarked underground utility/facility lines, cease excavation and contact MS811 immediately.
- **On Site Meeting Request: Utility representative is requesting to be on site during excavation**
 - The utility/facility company should have contacted you to set up the meeting. If they have not done so you should contact them yourself directly.
- **Locate Delayed: Locate Delayed**
 - The excavator should always contact you, directly, anytime there is a delay in locating. If the utility company must excavate to locate their lines, by law, they have an additional 2 working days to get their lines located. If the utility/facility does not have a legitimate reason for the delay you may file an violation against them using the Alleged Violation Reporting (AVR) tool locating on the MS811 website or by clicking [here](#).
- **Located To Meter Only: Private property beyond meter not located**
 - Most utility companies will only mark up to their meter or the property line if there is no meter. The landowner will be responsible for locating any underground utilities beyond that point.
- **No Response: Utility did not submit response**
 - The utility/facility company did not submit a response prior to the expiration of the ticket.
- **Non-Participant: Company is not currently participating in Positive Response**
 - The utility/facility company is not currently participating in the PR program. Keep in mind that utility/facility companies are not currently required by law to submit response information to the MS811 PRIS.

Any time a utility/facility has not marked, submitted a response or contacted you within 2 working days of the notification and you are not sure what to do, contact MS811.
